GlobalSource Intellectual Property Investigations

In today's global market, a company's most valuable assets are often their most vulnerable. With counterfeiting and outright intellectual property theft, today's intangible assets are increasingly exposed to a broad range of threats. This demands a global perspective and strategy.

GlobalSource has offices in Washington DC and Cyprus, and a network of investigators in North and South America, Europe, Russia, the Middle East, Asia and Africa. Our experienced team of investigative professionals is well positioned to meet today's IP protection challenges.

International Reach

GlobalSource is comfortable on the global playing field of IP investigations. Our expertise handles the difficult international cases that often overwhelm local IP protection agents. These cases span time zones and involve multiple jurisdictions. Our multinational manufacturing clients know that if they need to examine counterfeit products in Pakistan, illicit trade in Native American reservations, or smuggling in Cameroon - GlobalSource delivers results.

Multi-disciplinary Approach

IP cases are rarely straightforward, so GlobalSource adopts a unique multi-disciplinary approach. Client requirements often include such diverse tasks as searching public records, interviewing witnesses, making sample purchases of counterfeit goods, or even reviewing financial information on suspected trademark thieves – all in diverse places, languages and cultures.

GlobalSource investigators are international in background and multi-disciplined in skills. They and our researchers are multilingual professionals in finance, banking, insurance, law enforcement and journalism. GlobalSource always has on instant call exactly the right qualified people necessary to get the information our clients need, and quickly.

Broad portfolio of services

GlobalSource clients include major pharmaceutical, clothing, footwear, tobacco, food and drink, automotive, and software brand owners. GlobalSource offers a range of services in intellectual property and anti-counterfeiting investigations, including:

- * Global trademark, patent, copyright and design rights investigations
- * Anti-counterfeiting and 'look-alike' inquiries
- * Gray market, parallel market and diversion investigations
- * Enforcement agency liaison and support
- * Supply-chain controls and factory auditing
